PROFESSIONAL EXPERIENCE

Hue Medical Holdings

Operations Manager

Houston, TX

May 2026 – Present

- Serve as primary liaison with outside legal counsel on contracts, compliance, and risk matters related to new technology initiatives
- Led patent research to support business strategy and inform IP-related decisions
- Advise leadership on adoption of new technology and digital solutions, weighing trade-offs to support scalability and operational efficiency across multiple facilities
- Travel on-site across facilities to assess workflows and identify opportunities to standardize processes and improve cross-facility efficiency

University of Michigan Medical School

Undergraduate Research Assistant

Boston, MA

December 2025 – Present

- Design and execute drug synergy analyses identifying optimal combinations using Loewe scores across genomics, metabolomics, and transcriptomics datasets
- Develop customized Python pipelines to analyze 5,000+ drug-gene interactions in ovarian cancer cell lines OVCAR-4 and OVCAR-5

Link Lab at Northeastern University

Undergraduate Research Scholar

Boston, MA

June 2025 – January 2026

- Analyzed multi-variable datasets encompassing 3,500+ data points across 120 postpartum participants to identify correlations between diastasis recti severity and functional outcomes
- Built automated data visualization pipelines in Python to generate 8 interactive dashboards tracking recovery trajectories and treatment efficacy patterns

Beats by Dre

Market Research & Branding Strategy Intern

Culver City, CA

May 2024 – July 2024

- Led competitive market analysis to inform the strategic case for relaunching the Beats Pill, identifying audience demand signals and cultural timing that supported the comeback decision
- Contributed to go-to-market strategy for two high-profile launches — the Beats Pill relaunch and the Pro X Kim Kardashian collection — synthesizing consumer research across 1,000+ participants into recommendations presented to senior leadership
- Used Adobe Analytics to track and evaluate ecommerce and campaign performance metrics

Nutex Health Inc.

Business Strategy and Operations Intern

Houston, TX

May 2021 – August 2022

- Conducted healthcare market analysis and competitive research, identifying growth opportunities and market positioning insights
- Designed and launched community outreach programs including health fairs, educational workshops, and local partnership initiatives

EDUCATION

Northeastern University, D'Amore-McKim School of Business

B.S., Business Administration & Health Science — Concentration: Finance | GPA: 3.78

Boston, MA

- Relevant Coursework: Financial Modeling, Computational Methods, Epidemiology, Investments, Global Health
- Activities: NCAA Division I TaeKwonDo Athlete (3x ECTC Champion) | MEDLife

PERSONAL PROJECT

Athlete Injury Risk Prevention Dashboard

November 2025 – January 2026

- Developed a web dashboard predicting athlete injury risk using evidence-based training load analytics, generating 0–100 risk scores with actionable load management recommendations
- Built a multi-factor risk model combining sports medicine metrics (ACWR, load spikes, soreness) weighted by clinical research to identify high-risk periods across 20 athletes over 120 days
